Direction for questions 51 - 55:

Read the following passage carefully and answer the related questions.

PASSAGE

Aldinga reef is a watery paradise, a teeming sea jungle, a happy hunting ground for underwater spear-fisherman like myself. Forty of us each in black rubber suit and flippers, glass-windowed face mask and spear-fishing gun were waiting for the reference's nine-O'clock whistle to announce that the annual South Australian skin diving and appear-fishing championship competition has began. Each of us would have five hours to bring in to the judge the biggest bag, reckoned both by total weight and by number of different species of fish. My own chances looked good. I had owned the 1962-63 championship and I had been runner-up the next session. I had promised Kay that this would be my last competition. I meant to clinch to the title and then retire in glory, diving thenceforth only for fun, when Kay and I might both want to.

Lesser sharks - like the Bronze whaler and Grey nurse - are familiar to skin divers and have not proved aggressive. Fortunately the dread white hunter or 'white death' sharks, caught by professional fishermen in the open ocean, are rarely seen by the skin divers. But as a precaution two high powered patrol boats criss-crossed our hunting area keeping a wary lookout.

Read the following passage carefully and answer the related questions.

PASSAGE

Most of us use the products of science-railways, aeroplanes, electricity, wireless and thousands of others – without thinking how they came into existence. We take them for granted, as if we were entitled to them as a matter of right. And we are very proud of the fact that we live in an advanced age and are ourselves so very 'advanced'. Now, there is no doubt that our age is a very different one from previous ages and I think it is perfectly correct to say that it is far more advanced. But that is a different thing from saying that we as individuals or groups are more advanced. It would be the height of absurdity to say that because an engine-driver can run an engine and Plato or Socrates could not, the engine-driver is more advanced that, or is superior to Plato or Socrates. But it would be perfectly correct to say that the engine itself is a more advanced method of locomotion than Plato's chariot was.

Questions:

78.	Which one of the following statements is TRUE?	- 4
